

SauceDemo – Test Plan

Part 1 – Test Plan Overview

1. Scope

- Login – Test login functionality and validation.
- Product Browsing – Test product display, product details and filters.
- Cart – Test addition and removal of products in the cart.
- Checkout – Test checkout information and its validation.

2. Types of Testing

- Functional Testing
- UI Testing
- Negative Testing
- Edge Case Testing
- Cross-Browser Testing

3. Test Environment

Parameter	Details
OS	Windows 10
Browser	Google Chrome
Device	Laptop
Testing Type	Manual Testing
Application / Website	SauceDemo

4. Test Data

Data Type	Test Data
Username	standard_user
Password	secret_sauce
Other Usernames	locked_out_user, problem_user, performance_glitch_user
Invalid Username	Sdemo_user
Invalid Password	Sdemo_sauce
Empty Username	Blank
Empty Password	Blank
Checkout First Name	Prakash
Checkout Last Name	Bugade
Checkout Postal Code	416122

5. Test Cases

Test cases were prepared for login, menu options, product browsing, product details, filters, cart operations and checkout. Each test case records the expected result, actual result, test result and priority.

6. Risk Assessment

Module	Risk	Impact
Login	Authentication or validation problems	High
Product Browsing	Incorrect product information, images or filters	High
Cart	Products may not be added or removed correctly	Medium
Checkout	Checkout information or order flow may fail	High

7. Testing Approach

The testing approach started with the main user flow and then covered positive, negative and edge-case scenarios. Different user accounts were tested, followed by exploratory testing to identify unexpected issues.

8. Conclusion

The Test Plan covers the main SauceDemo modules and the planned manual testing activities. The identified issues were documented separately in the Bug Report.
